

SHREYA GAIKWAD

FINAL YEAR AI/ML STUDENT

Pune, Maharashtra, India
shreya.gaikwad467@gmail.com
+91 7249512932

SUMMARY

Final-year engineering student in Artificial Intelligence and Machine Learning (SGPA 9.14) with hands-on technical experience building and evaluating ML systems, and growing interest in how AI technologies affect society. Experience communicating AI concepts to public audiences as a Google Gemini Student Ambassador, and researching the real-world reliability of LLM-based tools. Motivated to bring a practitioner's technical grounding to interdisciplinary research on AI's societal impact, having seen firsthand how quickly capable AI tools are adopted with limited public understanding of their limitations and downstream effects.

PROFESSIONAL EXPERIENCE

Google Gemini Student Ambassador

May 2026 - Present

- Promote public understanding of generative AI through student-facing workshops and events on Google Gemini and AI tools.

Machine Learning Intern, VentCorp

Jan 2026 - Feb 2026

- Built and evaluated classification and regression models (Linear/Logistic Regression, KNN, Decision Trees, Random Forest), gaining first-hand insight into how model design choices and data preprocessing decisions shape real-world outputs.

IoT Intern, Dolphin Labs Embedded Systems

Jun 2023 - Jul 2023

- Developed Arduino-based IoT projects integrating GPS/GSM hardware with software systems, including a safety-oriented item-tracking device.

RESEARCH & PUBLICATIONS

Zero-Shot Software Debugging using LLMs

- Researched and applied zero-shot prompting techniques with Large Language Models to detect and debug software errors without task-specific training data.

SMS-Based IoT Key Finder using GPS and GSM Integration

- Built an IoT device combining GPS and GSM modules to locate lost items via SMS commands.

EDUCATION

B.E. in Artificial Intelligence & Machine Learning

2024 - Present

- ISBM College of Engineering | 6th semester SGPA: 9.14

Diploma in Computer Engineering

2021 - 2024

- JSPM's Rajarshi Shahu College of Engineering | First Class Distinction: 79.94%

SKILLS AND LANGUAGES

- Programming Languages:** Python, JavaScript, SQL
- Web Development:** HTML, CSS, JavaScript, Django, Flask, FastAPI, REST API development
- Databases:** MySQL
- Data Analysis and Visualization:** NumPy, Pandas, Matplotlib, Seaborn
- Tools and Platforms:** Git, GitHub
- Concepts:** Object-Oriented Programming, Data Structures and Algorithms, Artificial Intelligence, Machine Learning
